

DEPARTMENT OF THE ARMY
NEW ENGLAND DIVISION, CORPS OF ENGINEERS
WALTHAM, MASS.

DIGEST OF PUBLIC HEARINGS
ON
CHARLES RIVER WATERSHED, MASSACHUSETTS
FOR
COMPREHENSIVE WATER AND RELATED LAND RESOURCES DEVELOPMENT
AT

WALTHAM	-	January 17, 1967
WELLESLEY	-	January 19, 1967
FRANKLIN	-	January 24, 1967

INTRODUCTION

This digest has been developed from the minutes of the three hearings conducted by the Corps of Engineers, New England Division. As similar statements may have been presented at more than one hearing, a resume of statements is submitted with a notation as to the hearing or hearings at which it was presented. The contributors have been grouped as shown on the following table of contents.

TABLE OF CONTENTS

- I. - FEDERAL AND STATE ELECTED OFFICIALS
- II. - FEDERAL AND STATE AGENCIES
 - 1. Federal-Coordinating Committee Members
 - 2. Other Federal
 - 3. State-Coordinating Committee Members
 - 4. Other State
- III. - STATE ORGANIZATIONS
- IV. - REGIONAL ORGANIZATIONS
- V. - CITY AND TOWN
 - 1. Public Agencies
 - 2. Private Agencies
 - 3. Individuals

I. FEDERAL AND STATE ELECTED OFFICIALS

1. MEMBERS OF U. S. HOUSE OF REPRESENTATIVES

- a. Honorable Philip J. Philbin, Representative in Congress (Franklin Hearing)

Telegram expresses regret that cannot attend. Reports that President's budget requests additional \$140,000 for Charles Basin study. Thankful that Franklin hearing will cover problems of upper basin. Is sure that local testimony will pinpoint such problems as flood control for flash-type flooding, pollution, wildlife preservation, recreational needs and land use.

2. STATE SENATORS

- a. Honorable Oliver F. Ames, 3rd Suffolk District (Waltham Hearing)

States that many varieties of pollution exist in the Charles River. Serious problem of fumes and odors is caused by salt water admitted by dam at foot of the basin. He hopes the needed construction of new dam would qualify for Federal assistance. The flow rate of the river should be augmented. Has called for dredging and cleaning of Muddy Brook which is now a stagnant ditch, but flow and improvement depend on steps for improving Charles River. Coordination of pollution control is vital for permanent progress in improving the Charles. Attention should be given to aesthetics, during improvement, keeping in mind the original design conceived by great architects.

- b. Honorable James DeNormandie, Fifth Middlesex Senatorial District (At Waltham)

Says problems of Charles River are elimination of pollution; water augmentation; acquisition of maximum amount of land adjacent to river for recreation; and flood control, principally affecting lower basin. Augmentation not easy to accomplish here because difficult to establish storage areas. Suggests Corps study possibility of increasing storm storage capacity of MDC water supply system for augmentation of the Charles in dry months. There should be a maximum realistic land acquisition program and many old buildings should be removed to restore land to open space for recreation and the pleasure of the neighborhood. Values from upgrading of property and recreation will repay many times

over the cost of cleaning up the river. Urges restoration of the Charles be accomplished in as natural a manner as possible.

- c. Honorable John F. Quinlan, Second Norfolk District (Statement read by a representative at Franklin Hearing)

Senator Quinlan is most interested in the opinions of the various groups concerning the study. Chairmanship of a March of Dimes dinner prevents him from attending.

3. REPRESENTATIVES TO THE GENERAL COURT

- a. Honorable John St. Cyr, 12th Norfolk District (Franklin Hearing)

Says we cannot ignore a river like the Charles for years and then solve problems at once. Hopes the investigation will lead to legislation giving benefits from the Charles. Is aware of problems of too much or too little water. Hopes Federal and state governments can cooperate in a project such as that at North Adams on Hoosic River. Our problems are control of the uses of Charles River so that it may be source of pure water and recreation.

- b. Honorable Maurice E. Frye, Jr., 3rd District, Boston (Waltham Hearing)

Hopes for ultimate answer to problem of pollution in Charles River so that river can be used for recreation. Clearing of Muddy River is necessary and preferable to enclosing it in a culvert.

4. REPRESENTATIVES PRESENT AND ACKNOWLEDGED

Honorable Charles Flaherty, of Cambridge (at Waltham Hearing)
Honorable Charles W. Long, of Westwood (at Waltham Hearing)
Honorable Edward M. Dickson, of Weston (at Wellesley Hearing)

II. FEDERAL AND STATE AGENCIES

1. FEDERAL COORDINATING COMMITTEE MEMBERS

a. Corps of Engineers

- (1) Colonel Remi O. Renier, U. S. A., Acting Division Engineer, New England Division, U. S. Army Corps of Engineers; Chairman of the Coordinating Committee for the study of the Charles River Watershed.

Colonel Renier presided at all three hearings and outlined the ground rules for the conduct of the hearings and procedures to be followed in the study.

- (2) Mr. Edward L. Hill, Chief, Planning Branch of the New England Division described the watershed and specific known problem areas at the three hearings.

b. United States Department of Agriculture

- (1) Karl R. Klingelhofer (Waltham and Wellesley Hearings)

The Department will assist in preparation of the plan for conservation and development of the water and related land resources to obtain information on present and prospective land uses. The Soil Conservation Service has made soil surveys for several towns in the watershed. The Department can also assist in the appraisal of rural community water problems and the potential for water resource development, particularly in the upstream areas.

- (2) Henry J. Ritzer (Franklin Hearing)

Mr. Ritzer described the participation of the Department exactly as outlined by Mr. Klingelhofer in the two preceding hearings.

c. Department of Commerce

- (1) Alfred Anderson (Waltham Hearing)

Mr. Anderson stated that he is a representative of the Economic Development Administration of the Department, whose specific interest is with the economic projections developed during the study, with particular reference to areas specifically designated for assistance under the Public Works and Economic Development Act of 1965.

c. Department of Commerce (continued)

(2) Arthur Doyle (Franklin Hearing)

Mr. Doyle stated that as a representative of the Economic Development Administration he can offer cooperation and assistance in the study.

d. United States Department of Health, Education, and Welfare

(1) Alfred V. Soukup (Wellesley and Franklin hearings)

Mr. Soukup represents the United States Public Health Service of the Department. Health aspects of Charles River study must be considered, particularly with reference to the effects of water and related land resources developments upon insects of public health significance. He pointed out that use of recreational facilities in some New England areas has been greatly reduced by insect pests, and cited the possibility that mosquitos and aquatic species may increase in the vicinity of impoundments. The Public Health Service will also concern itself with public health aspects of water quality where water is used for domestic supply, bathing and water contact recreation.

(2) Frank Tetzlaff (Waltham Hearing)

Mr. Tetzlaff outlined the participation of the Public Health Service in a similar manner as that described by Mr. Soukup.

e. United States Department of Housing and Urban Development

(1) Sirrouko Howard (Wellesley Hearing)

He stated that the Open Space and Beautification programs of the Department might be integrated into plans for the watershed to good advantage. Both programs permit installation of basic recreational facilities. He intends to look into possibilities for dovetailing these programs into other state and federal efforts without overlapping.

f. United States Department of Interior

(1) James W. Lambie (Wellesley hearing)

He represents the Federal Water Pollution Control Administration in the Department with basic responsibilities in the

determination of need for flow augmentation and value of water resource development for meeting desired water quality needs. The studies on flow augmentation will be coordinated with the MDC, MAPC and the Massachusetts Division of Water Pollution Control.

(2) Walter M. Newman (Waltham and Franklin hearings)

Also represented Federal Water Pollution Control Administration of the Interior Department with responsibilities as outlined by Mr. Lambie, above.

2. OTHER FEDERAL

a. United States Army Corps of Engineers, New England Division

(1) Joseph L. Ignazio, Chief of Basin Planning Section,
(Wellesley Hearing)

In reply to a question from the floor, Mr. Ignazio advised that his section is collecting data on the various ranges of river flow in cubic feet per second.

In reply to another question relating to new research methods as applied to the Charles River Basin, Mr. Ignazio referred to such techniques as device for simulating rain storms, and to the extensive and long experience in the New England area.

b. United States Department of Agriculture

(1) Peter W. Larson, Agricultural Agent, Soil Conservation Service (Franklin Hearing)

Offers assistance of the Extension Service, and cites long experience with area landowners and more recent assistance to town conservation commissions. Asks for consideration for agricultural owners in land acquisition.

c. United States Department of Interior

Statement from the Fish and Wildlife Service (Waltham Hearing) to be entered into records. This refers to a Review Draft Report covering various aspects of Fish and Wildlife problems in the watershed and suggests impoundments for wildlife benefits. Report to be reviewed by the coordinating committee.

3. STATE COORDINATING COMMITTEE MEMBERS

a. Metropolitan District Commission

- (1) Howard Whitmore, Jr., Commissioner (Waltham and Wellesley Hearings)

Outlined background of the MDC and delineated area of the Charles River Basin under MDC jurisdiction. Commission serves 17 of the 28 basin cities and towns. The MDC Park system acquires and develops river lands, owns more than 1,800 acres in the Basin expressed as $25\frac{1}{2}$ linear miles of riverbank and controls an additional 3.6 miles, the total being equivalent to 80.5% of total riverbank miles. The MDC sewerage system serves numerous basin communities. Future construction of the new south-north relief conduits will increase capacity for removal of sewage which now overloads mains. At present old systems combine sewage and storm water in one drain. Plans for overload storage will reduce sewage input into Charles River. MDC water supply system extends 70 miles from Boston. Studies to find new water supply sources are in progress, including analyses of diversion from the Connecticut and Millers Rivers. Legislation permits discharge of up to 15 mgd for a maximum of 500 million gd per year into Charles River to dilute pollution in drought periods. Some proposed recreational developments on Charles River include a fishway at Cordingly Dam and small boat locks at the Charles River dam which will reduce salt water intrusion into the basin. He also listed a number of proposed projects, including channel improvements, recreational development and acquisition for recreation and conservation areas.

- (2) Max H. Straw (Franklin Hearing) Engineering Asst. to Comm'r.

Outlined the history, functions and future projects planned in the Basin along the same lines as indicated by Commissioner Whitmore.

b. Massachusetts Department of Natural Resources

- (1) Arthur Brownell (Franklin Hearing)

Offered the services of the Department.

- (2) Hans Van Leer (Wellesley Hearing)

Outlined the services which could be rendered to the study through town conservation commissions and soil conservation districts.

b. Massachusetts Department of Natural Resources (continued)

(3) Albert Zabriskie (Waltham Hearing)

Offered the services of the Department through the Divisions of Forests and Parks, Law Enforcement, Fisheries and Game, Marine Fisheries and Water Resources.

4. OTHER STATE OFFICIALS

a. Metropolitan Area Planning Council

(1) Miss Julia Broderick, Planner (Waltham and Wellesley Hearings)

Cites authority for Council to prepare plan for physical, social, and economic improvement of the District; guidelines for development aim to "conserve the water bodies, watersheds, and natural drainage areas."

Policy is to reclaim inland coastal waters and provide for continued purity. Careful conservation practices are imperative. Speaker cites the importance of water resources in eastern Massachusetts. In view of present and projected use of water resources, pollution is an intolerable waste. The Council's position is that our inland waters would be protected through public ownership or control. Council will submit detailed plan for the Charles River. Recommends that Corps of Engineers incorporate in comprehensive study program the following: a series of reports and meetings with local communities; participation of the Department of Interior (Bureau of Outdoor Recreation) and other appropriate Federal agencies; recommendations for ways of Federal financing of protection and maintenance of water resources; analysis of the various proposals for ponding, dredging, and canal extensions; hydrological data, a study of flood and flow regulation that leave countryside as natural as possible; study of conservation areas and reports on aesthetic qualities of various areas; consideration of Charles River Park system; studies of water quality, anadromous fish, effects of motor boating, drainage problems, upstream pollution, and the relationship of Mother Brook to the total Charles and Neponset system. Should establish priorities for development and formulate necessary legislation to protect and enhance Charles River as an open space and recreational resource.

a. Metropolitan Area Planning Council (continued)

(2) William Melia (Franklin Hearing)

Same statement as given by Miss Broderick.

b. Massachusetts Bay Transportation Authority

(1) Rush B. Lincoln, General Manager (Waltham Hearing)

Letter which reads "The Authority supports the study especially as it relates to flood control of Muddy River. Existing MDC flood control work gives insufficient protection for Highland Branch, transit tracks, Kenmore subway and contiguous areas. Authority has filed legislation requiring MDC study."

c. Massachusetts Department of Natural Resources

(1) Richard Cronin, Division of Fisheries and Game (Franklin hearing)

Entered a statement on behalf of the Division. The principal points outlined included: high recreational demand in watershed and a high fishing and hunting potential, presently unfulfilled. Potentials to support runs of shad, herring and salmon, and other resident cold and warm water fish. Marshes have potential for waterfowl, and uplands for upland game. The Division has completed a more detailed report in cooperation with the U. S. Fish and Wildlife Service.

(2) Leigh Bridges, Division of Marine Fisheries (Franklin Hearing)

Proposed fish restoration efforts from the mouth to headwaters and specified dam improvements, alterations and the installation of fish passages for anadromous fish at Charles River, Bleachery, Moody Street, Washington St., Cordingly, Boylston St., Upper Newton Falls, Silk Mill, Charles River Village, and South Natick dams. Strongly urged the Corps to include anadromous fish restoration in its plans, and to work cooperatively with the Division of Marine Fisheries for this purpose.

d. Massachusetts Department of Public Works

(1) Edward J. Ribbs, Commissioner (Waltham Hearing)

Sends telegram requesting an accelerated flood study of Muddy River and Stony Brook since they may be altered and relocated in Inner Belt highway construction.

e. Massachusetts Historical Commission

(1) Richard Hale, State Archivist (Franklin hearing)

Stated the Charles River valley has great historic assets - 10,000 years of pre-history, and 400 years of history. Offered the co-operation of the Historical Commission in this study.

III. STATE ORGANIZATIONS

1. GARDEN CLUB FEDERATION OF MASSACHUSETTS

a. Mrs. Ruth Burke (Waltham Hearing)

Stresses importance of restoring river bank areas to former natural state after engineering construction work.

b. Mrs. Franklin Sanders (Wellesley Hearing)

Proposes consultation with competent landscape architects and garden clubs in landscaping river areas, and plans to include preservation through careful selection of plant material. Urges restoration of banks following any engineering work, and full regard for the importance of native plants in erosion control and shoreline protection.

2. MASSACHUSETTS ASSOCIATION OF CONSERVATION COMMISSIONS

a. Mrs. Earl H. Bourne (Franklin Hearing)

Enters a statement on behalf of the board of directors of the association, approving the aims of the Charles River Watershed Association, in the ultimate use of the Charles River, the protection of its watershed, and the preservation of major conservation areas along its course.

3. MASSACHUSETTS FOREST AND PARK ASSOCIATION

a. Benjamin W. Nason, Executive Director (Franklin Hearing)

The principal concern of the Association is the inadequacy of the Charles River to serve growing water supply and active and passive recreational needs of residents and visitors. The problem will grow worse unless pollution sources are brought under control and the destruction of river banks and adjacent wetlands is stopped. The Association will give support to dredging projects only if absolutely essential for flood control, but will not support such projects if only of marginal value, on the grounds that such projects invite industrial and home developments in flood plains. Suggests state legislation further restricting new developments in flood plains.

4. MASSACHUSETTS WILDLIFE FEDERATION

a. Lester B. Smith, Chairman of the National Affairs Committee (Waltham and Wellesley Hearings)

The Federation recommends that the Bureau of Outdoor Recreation and the Massachusetts Division of Fisheries and Game be added to the Coordinating Committee. (Wellesley Hearing).

Asks Colonel Renier whether it will be possible to complete the Charles River study in less than five years. (Waltham Hearing).

IV. REGIONAL ORGANIZATIONS

1. CHARLES RIVER WATERSHED ASSOCIATION

a. F. E. Whitmarsh, President (Waltham Hearing)

Is disturbed that economic justification is proposed for the undertakings of the watershed plans. Believes there may be too much emphasis on the pollution aspect, since the chief values are recreational. Recommends immediate land acquisition program to protect the presently unspoiled riverbank areas not under public ownership or control, before land is taken by business, industry or developers of housing developments. Urges that One agency be responsible for entire river. Recommends that the banks of the Charles be held in public trust forever.

1. CHARLES RIVER WATERSHED ASSOCIATION (continued)

b. Richard J. Alexander, Planning Consultant for Association

Recommends that Recreation elements be emphasized throughout the course of the study. Calls for early interim recreational plans and for a land acquisition fund. Proposes intensive study of lands surrounding portion of basin which would be created by proposed Warren Avenue dam. Suggests study of the following: possible adverse effects on landscape in the event Memorial Drive is converted from a parkway to a standard arterial highway; disposition of Watertown Arsenal and how this could fit the comprehensive plan. Cites the mis-use of river banks from Watertown dam to Natick, listing dumps, parking lots, open storage areas and buildings in the wrong places, as examples.

c. Kenneth Wood, Vice President (Franklin Hearing)

Points to the different character of the upper end of the Charles River from the downstream portion. The spread-out population density has not precluded overdevelopment in areas. He repeats the main belief of the Watershed Association that the primary consideration should be that the Charles River is a permanent recreational watershed. Suggests the feasibility of establishing boundaries of the flood plains, so that the Hatch Act or any type of legislation will be easier to implement locally. Calls for protection of the watershed, and referral system among agencies and the Association to avoid unforeseen encroachment on recharge areas by any type of development, before they commence. Suggests small structures in tributaries for water retention, for flood control, low flow augmentation and recreational use. The Association believes water quality should be of a "B" classification. Urges regulation of motor boating on Charles, and requests that such groups as the League of Women Voters and the Charles River Watershed Association be represented on the Citizens' Committee. Pledges cooperation of the Association.

2. CHARLES RIVER VALLEY GROUP, LEAGUE OF WOMEN VOTERS

a. Mrs. Alexander Liveright (Waltham Hearing)

League feels that recreational use far outweighs any other possible uses. Discusses present uses of river including transportation by barges; dumping by municipalities and by industries, with problem areas specified in areas. Hopes that any new buildings near the river under redevelopment programs be aesthetically attractive and suggests

a. Mrs. Alexander Liveright (Waltham Hearing) (continued)

the formulation of a design code for construction. Mentions great boating potential of river. Proposes that all parking lots be removed inland from the riverbanks, and more public access for walkers and cyclists be provided. Expresses hope that the Inner Belt will not worsen the Muddy River problems. (The League proposes more detailed recommendations contained in Exhibit 8.)

b. Mrs. Russell Haddleton (Waltham hearing)

Emphasized Mrs. Liveright's points and calls for coordination among all Federal, State, local and private agencies in the program. Notes that there are sixteen Leagues in the Watershed. Urges the proposed Citizens' Committee and further urges that this group have voice in the policy making.

c. Mrs. Robert A. Smith (Wellesley Hearing)

Cites great real estate pressure on Charles' banks in Wellesley area and hopes for a "green belt" type of preservation. Urges the following: preservation of natural banks, improvement of banks and nearby structures; set-back of parking lots from banks; landscaping after construction; set-back of commercial buildings when inevitable; discontinue building in flood plain zones; more access for canoes.

d. Mrs. Thomas P. Murray (Franklin hearing)

Is concerned with wetland preservation and cited Medfield's many acres of marshes, and wet lands. Re-stated the views of the above representatives as far as stream bank restoration and planting. Warns against urbanization of upper Charles River. Notes the great problem of flow in dry periods.

3. NEW ENGLAND WILDFLOWER PRESERVATION SOCIETY, INC.

a. Mrs. Alexander MacLeod, Director (Wellesley Hearing)

The Society supports the recommendations of the Citizen's Panel, Aesthetic Considerations, Corps of Engineers Water Resources Development Projects in New England. Cites instances of red maples being killed along the Charles River and urges methods to prevent further loss of red maples.

4. NORFOLK CONSERVATION DISTRICT

a. William Sweet, Chairman (Franklin Hearing)

Offers cooperation of District to Corps study. Stresses need for wise management of tributaries. The District memorializes the Corps to: (1) guarantee protection of wetlands in perpetuity; (2) develop recreation facilities on specified tributaries; (3) watershed regional planning; (4) implement a soils inventory of watershed towns; (5) prepare a recreational inventory.

V - CITY AND TOWN

1. PUBLIC AGENCIES

a. Boston

(1) Hon. John F. Collins, Mayor (Waltham hearing)

Telegram received states that representatives of the City will attend hearings as observers.

(2) City Council (Waltham hearing)

Entered statement into record - Exhibit #16. Urges the Corps to work to end pollution of Charles River; to consider the waterfront, Boston Harbor and Neponset River Valley as one contiguous area and develop far-reaching plans in accord with this concept.

(3) Boston Redevelopment Authority

John Stainton (Franklin hearing)

Particularly concerned with shoreline and banks of Charles along boundaries of city of Boston. Proposes to leave with the Corps two recent studies - Boston General Plan 1965-1975, and the North Terminal Area study.

Points to pollution problems of municipal dump in West Roxbury, adjacent to river. Is concerned about continued public access, a disappearing resource; with the potential of Mother Brook. Mentions other problem areas - Gardiner Street municipal dump, Warren Avenue proposed dam, the Muddy River as affected by dredging and the construction of the Inner Belt. The BRA plans series of studies to evaluate master plans affecting the Charles River. Welcomes interim reports and progress studies undertaken by the Corps, and hopes for a continuing mutually beneficial relationship with the Corps in the development of plans for the use of the Charles River.

b. Town of Dedham

(1) Board of Selectmen (Wellesley hearing)

The Selectmen's basic concern is the preservation of flood plains in natural state for flood control and aesthetic reasons. Dedham plans to accomplish this on a time schedule through zoning and acquisition.

(2) Conservation Commission, Elizabeth W. Berle, Secretary
(Wellesley hearing)

The statement of the Selectmen and Conservation Commission is jointly entered into the record.

c. Town of Dover

Conservation Commission, Mrs. Harriet W. Long, Chairman
(Franklin hearing)

Urges strong stand on protection of natural areas for: intangible values inherent in environmental beauty; passive recreation, canoeing and nature study; preserving fish and wildlife habitat. Hopes for public protection of the river, accessible to hikers. Believes that river should be zoned for boating, with adequate enforcement, and that motor boats should be banned in upper reaches for the following reasons: pollution of water; noise and nuisance; danger to wildlife; erosion of banks and destruction of fish nests by wash of speeding motor boats.

Mrs. Long turned over material marked Exhibit No. 4 - "Notes from a Naturalist, Observations on canoeing a short stretch of the Charles River, in the Medfield Marshes and Rocky Narrows, 1966".

d. Town of Franklin

George M. Doyle, Franklin Reservoir Survey Committee
(Franklin hearing)

States town's need for adequate drinking water due to population increase from 7,500 - 16,000 in last 10 years. Town proposes to take area south of new Route 495, Mine Brook, Dick's Brook and Miscoe Meadow for future reservoir site. Town has spent \$50,000 and Federal Government has contributed for feasibility study. Hopes for an 880-acre reservoir with capacity of 1.3 billion gallons.

e. Town of Medway

Conservation Commission, O. Scott Fader (Franklin hearing)

Suggests that much pollution derives from institutions along river and urges this as a first study.

f. Town of Natick

Conservation Commission, George H. Wallace (Wellesley hearing)

Conservation Commission has designated 180 acres in flood zone under a wilderness classification. Commission strongly urges the Corps to study the following: methods by which town can enact and enforce flood plain and conservancy zoning; impact of a proposed community college on the Stillman Property in South Natick; the feasibility of establishing an historical district in South Natick; the creation of small capacity storage ponds on South Natick and upstream tributaries; the sources of pollution. The Commission also proposes action by the Corps to expedite flood plain land acquisition through state and federal cost-sharing at an early stage in the planning of the Charles River. Urges coordination of all agencies involved.

g. Town of Needham

(1) Conservation Commission (Wellesley hearing)

Statement entered into the record and marked Exhibit No. 7. The Conservation Commission believes canoeing is top use of the Charles River. Town's flood plain zoning will help preserve canoeing opportunity. Advises that the Needham YMCA operates a canoe and small boat livery at Red Wing Bay, and that the only other canoe access point is on the Charles River Peninsula Reservation under ownership of the Trustees of Reservations. Needham's summer swimming facilities at Rosemary Lake are over-crowded.

(2) Planning Board (Wellesley hearing)

Hopes for full consideration of the preservation of ample flow and for pollution abatement which will result in an early "C" classification upstream from Waltham, with a "B" classification the ultimate aim. Board recommends state-wide enabling legislation to attain effective flood-plain zoning.

h. City of Newton

(1) Honorable Monte G. Basbas, Mayor (Wellesley hearing)

Letter entered into record.

(2) James A. Miller, Planning Director (Wellesley hearing)

Reads Mayor Basbas' letter urging broadening scope of the watershed survey study. This should be truly comprehensive; should inventory all data, define needs, establish goals, outline programs. He hopes the recommendations of Newton's and other neighboring communities' studies will be correlated and included in the watershed study. Corps should provide for interim or phased recommendations and procedure to disseminate them for use by communities during the study. Also Corps should analyze each major project by city, M.D.C., or other agency to assure consistency with long-range goals.

(3) City Physician, Hale M. Cook, M.D. (Wellesley hearing)
Health Department

Asks that inclusion of a bicycle path on both sides of the river be considered. Cites health values to families and police travel by motor scooter through this means of access.

i. City of Waltham

Paul W. Giunta, City Councillor (Waltham hearing)

Hopes this study will be carried to completion and not forgotten. Praises the efforts of the League of Women Voters in bringing active people together. Cited encroachments on MDC park lands over past 20 years and asks if this policy will continue or whether MDC will change to more effective control of their riverbank reservations.

j. Town of Wellesley

Conservation Commission, Warren Little, Chairman (Wellesley hearing)

States need for re-planting of banks between Newton Upper and Newton Lower Falls. Suggests installation of fishladder at Newton Lower Falls, and requests improvement and protection of the Hemlock Gorge Area off Worcester St. and a fishladder in this area also.

k. Town of Wrentham

Conservation Commission, Marjorie Taylor, Chairman (Franklin hearing)

The Commission hopes for elimination of pollution downstream, and the creation of a water storage reservoir in the Fenwood area below Eagle Brook. The Commission has a plan by Egbert Hans, landscape

architect of the Department of Natural Resources for recreational facilities and submits this map and plan.

2. PRIVATE AGENCIES

a. Boston

(1) Boston Society of Architects, Robert S. Sturgis(Wellesley hearin

States he is Chairman of the Committee on Civic Design, which recommends that all Federal and State agencies having jurisdiction within the Charles River Watershed, including the Corps of Engineers, make their plans to reinforce the open space policies of the Metropolitan Area Planning Council.

(2) Boston Society of Landscape Architects

a. Vincent N. Merrill, (Wellesley hearing)

States that there is danger that the prime recreational potential of the entire river may be underrated on account of the reasonable concern for the engineering problems of pollution control. Hopes that a beautiful river will result, with opportunities for canoeist, rowing shells, passive recreation, nature study and walking and cycling. States that the Charles River is Boston's greatest natural recreational resource whose potential must be preserved and planned for this and future generations.

b. John Lee Wacker, President (Waltham hearing)

Charles River has been the concern of the Boston Society of Landscape Architects for 65 years. Hopes for a comprehensive master plan which will end conflicts and delays of the past for once and all. Offers a detailed plan for the study and expresses concern for the 5-year time gap before completion, and suggests local action through early interim plans and a strong land acquisition program. He lists the policies of the Society relative to the Charles River as follows: (1) Oppose any encroachment on park lands contrary to original purpose of acquisition; (2) preservation of wilderness areas; (3) conservation of natural scenery; (4) timely park land acquisition; (5) water conservation; (6) stream pollution must be halted by statutes which make pollution basis for criminal proceedings; (7) the collaboration of the design profession urged; (8) preservation of historic sites; and (9) open spaces preserved and acquired.

(3) Boston University, James A. True, Asst. to the Pres. (Waltham Hearing)

Boston University is fortunate to occupy a 45-acre strip of land between Commonwealth Avenue and the Charles River. Cites problems of University crew, numbering 50 men per day on the river. Damage to shells from floating objects and infections of blisters by river water contact. Suggests stricter traffic control during warmer months to resolve conflicts among shells, sailboats, canoes and power boats.

(4) Fenway Civic Association, Inc., Miss Roberta Chesnut, Pres. (Waltham hearing)

Is concerned with the condition of Muddy River. It is used for dumping and contains tons of rubbish and oil. Urges at least a short-term program now to clean it out. States that there is enough rubbish to employ 25 men for one month in the clean-up.

b. Dedham

(1) Citizens' Advisory Committee (Franklin hearing)

Is especially interested in the portion of Mother Brook in East Dedham, and the Urban Renewal Project in East Dedham Square which has aroused interest in cleaning up pollution, and the restoration of Old Mill Pond. The Dedham Conservation Commission has an article in the Warrant proposing that the brook from United Waste Co. to the Dedham-Hyde Park line be made a part of flood plain zoning. This project could help the needs of a Veterans' Housing Project and an Old Age Housing Project in the vicinity. Is also concerned at further ditching which may decrease the flow through Dedham. There is further concern that 300 feet of Mother Brook was buried underground at the Charles River Arcade last fall without as much as a public hearing or a discussion by the Selectmen until it was too late to prevent.

(2) Noble and Greenough School, F. B. Lawson (Wellesley hearing)

The school is generally in favor of retaining the river in its natural state and opposed to straightening on the basis that this might affect recreational uses of Motley Pond adversely. If it is necessary to straighten the river in this area, the School hopes that the skating area in the northwest cove of Motley Pond can be preserved; and that a straight stretch 120 feet wide and 3/4 mile in length can be made, since this would greatly improve the course for crew races and rowing conditions also.

c. Newton

Newton Conservators, Inc., B. F. Shattuck (Wellesley hearing)

Supports 1961 MDC plan for Charles River by Charles Eliot. Recreation is the first consideration. Cordingly Dam should be a combined engineering and park project. Recommend a study of natural areas around Hammond Pond; canoe access from Charles River Dam to Watertown; power boat restrictions; public control of banks from Upper Falls Playgrounds to Charles River Country Club; study of Webster Estate near Hammond Pond as a natural area; study of Shaw Estate near the river as a natural area; study of possibility of an historic district near Cordingly Dam. The Conservators call for a halt to the nibbling away of MDC park lands, and cite several examples.

d. Watertown

Watertown Yacht Club, John W. Grabski (Franklin hearing)

Cites shoaling of upper basin in Sunset Bay area, increase in floating debris and floating oils and pollution as hazards to boating. Requests study of the following: plan of new locks at Charles River dam; review of further diversion of salt water; dredging of Sunset Bay; pollution sources; and upstream impoundment of water to augment stream flow in dry spells.

e. Wellesley

(1) Wellesley Conservation Council, Franklin Sanders(Wellesley hearing)

This agency owns wildlife sanctuary areas on the river. The following areas are shown on the map of Parks and Public Lands; meander forming the boundary of Wellesley-Dover line from S. Natick to Needham; marsh lands between Routes 9 and 128; marshes between Cordingly Dam and Washington St., Lower Falls; both banks of the river from Washington St. through MDC holdings to Weston line.

(2) Wellesley Garden Club, Mrs. Sumner W. Ferris(Wellesley hearing)
Mrs. Joseph B. Fyffe " "

After lessening of the pollution, the Garden Club looks to recreation, scenic beauty, open space and Wildlife habitat. Hopes for a multi-purpose program, always aiming at preservation of a natural state. Recommends that the Corps review and adopt where possible the suggestions

- (2) Wellesley Garden Club, Mrs. Sumner W. Ferris
(Wellesley Hearing) Mrs. Joseph B. Fyffe (continued)

of the Citizens' Panel on Aesthetic Considerations, Corps of Engineers Projects, New England. Also urges the Corps to consult with the Garden Club's plan in the Lower Falls area, and to incorporate in its plan any ideas possible. A copy of plan can be made available.

- (3) Wellesley League of Women Voters, Mrs. Lydia Goodhue,
(Wellesley hearing)

Asked Commissioner Whitmore to explain how the Hatch Act might impair the work of MDC. Mr. Whitmore replied the authorities under the Hatch Act needed clarification.

- (4) Wellesley Park and Tree Board, Mrs. Mary H. Fyffe
(Wellesley hearing)

The Board recommends restoration and replanting on the following areas of the Charles River: Rte. 9 north to Rte. 128, MDC land and river; MDC land south from Weston line to Grossman's at Wellesley Lower Falls; Needham line upstream to River St., South Natick; and Rte. 128 downstream to Boulevard Rd., Wellesley. The Board questions the suitability of river lands on the Wellesley-Natick line for commercial development.

f. Weston

Rivers Country Day School, Conservation Class,
William M. Cantor (Wellesley hearing)

Early interim land acquisition urged. Other recommendations of the Conservation Class include: beautification of the banks; purification of water with swimming a goal; recreational planning; solid waste disposal study; study of dredging to speed flow; multi-purpose engineering works, fishladders and beautification; and an educational program for residents of the watershed.

3. INDIVIDUALS

a. Cambridge

Charles W. Eliot, Professional Planner and Landscape Architect
(Waltham hearing).

Refers to earlier planning of 1925 Bay Circuit study and to a study requested by MDC in 1960. Copies are available to the Coordinating Committee herewith, for the record. States that orthodox flood control structures are not appropriate to the Charles River - no rip-rap or smooth engineering lines. Cites historic interest of the mill dams. Recreation, active and passive, is the highest use of the river. He urges a concert of policies for all aspects, and unified control of the entire Charles River.

b. Medfield

Charles Cane, Resident of Medfield (Franklin hearing)

Urges public ownership as best means to control river and banks.

c. Medway

David Whitten, Medway Resident (Franklin hearing)

Believes the study is a good opportunity for coordinated efforts to enforce existing laws and regulations, especially the new Anti-Pollution Act.

d. Needham

John LeVert, Resident of Needham (Waltham hearing)

Requests clarification on objectives of Corps study and the new Federal legislation asking for pollution report by June 1967. Question was answered by Mr. Newman, U. S. Dept. of Interior on pp. 137-138 of minutes for the Waltham hearing.

e. Waltham

Charles English, interest in river excursion boats. (Submitted sketch at Waltham hearing)

States that many tourists travel on the Charles River excursion boats and that the odors and filth of the river are giving Boston a bad name outside of the state.

f. Weston

Charles MacLeod, Resident of Weston (Waltham hearing)

Requests information from Commissioner Whitmore regarding the exact amount of diversion from the Charles River to Mother Brook in Dedham, and if this diversion has any effect on the lower part of the Charles River.

g. Miscellaneous

Mrs. Walter Bradford Cannon, Franklin, N.H. (Waltham hearing)

Letter submitted (Exhibit 17). Hopes the government can protect the waters of the Charles River from its sources to its mouth.

CHARLES RIVER WATERSHED STUDY

ATTENDANCE AT JANUARY 1967 CORPS OF ENGINEERS HEARINGS

Waltham(WA), 17 January; Wellesley(WE), 19 January, and FRanklin(FR), 24 January 1967

(1) Spoke at hearing

(2) Entered a written statement, letter, or other communication into the record
